Interfoods

OUR SPECIALTY SELECTION OF CHIA

extra fruit Spreads

Our Chia & fruit spreads are authentic, natural and delicious products. Made with 4 ingredients only (Fruit, Cane Sugar, Chia Seeds and Fumaric Acid), with no added pectins., it does not contain pectins. With a bold, fruity and tasteful flavor profile, they bring a more delightful, colorful and affordable chia fruit spread option to our family of authentic and original chia fruit spreads.

Interfoods is always developing new products and innovative ideas. We are now launching our first production in the US. Our Standard Chia Fruit Spreads are manufactured in the US, made with natural, Non-GMO cane sugar from Mexico, and a combination of Mexican and Northwestern berries. The key of our concept is that our Fruit Spreads are made with Chia Seeds instead of pectin. We believe our innovative product is a market disrupter and the future of fruit spreads, as we will all prefer to put into our bodies whole unprocessed natural and healthy chia seeds, instead of industrially processed pectin. We selected chia, as the basic ingredient of this line of products, due to its magnificent healthy and mechanical properties. Chia seed is a marvelous ingredient. It is a nutritive and energetic food. It is a good source of Omega 3 ALA, Protein, Fibre, Antioxidants and Minerals.
